Education

Auburn University

B.S. in Computer Science

Relevant Coursework: Software Modeling & Design, Algorithms, Software Construction

Auburn, AL

Dec 2023

Projects

George Eliot Archive Social Network Visualization

Tech Stack: Node.js, D3.js, CSS

- Led a **complete overhaul** of a data visualization web application for the George Eliot Archive, an academic literary research project.
- Implemented **real-time data updates** to ensure visualizations reflected the latest research data, improving accuracy and usability.
- Enhanced **UI/UX** design to improve clarity and navigation for academic researchers.
- Optimized data processing algorithms, improving performance and responsiveness.

CSFloat Bargain Bot

Tech Stack: Express.js, Tailwind CSS, Node.js

- Built an automated, **fully configurable** bargaining bot for CSFloat that scans new listings and places offers based on custom pricing rules.
- Implemented **logic to evaluate listings** and generate fair-value offers targeting a 4-6% profit margin on resale.
- Utilized **Tailwind CSS** to create a **user-friendly GUI**, allowing users to configure the bot with no programming knowledge.

Not-ify (Full-Stack Music Streaming Platform) *Tech Stack: React, Node.js, Express.js, MongoDB*

- Developed a **full-stack music streaming platform** inspired by Spotify, enabling users to browse, search, and play music through a responsive web interface.
- Implemented **OAuth-based authentication** for secure user login, along with **authentication middleware for route protection** to restrict access to authenticated users only.
- Designed a backend system using **Node.js and Express.js with RESTful APIs**.
- Utilized **MongoDB for persistent** storage of user data and song metadata, supporting playlist management and dynamic content retrieval.

Experience

Student Developer

Jan 2023 – Dec 2023

- Worked on data visualization web applications under a professor in the Special Collections & Archives Unit of Auburn Library
- Gained hands-on scrum experience through multiple projects with the same team

Skills

Languages: JavaScript, TypeScript, Python, C++, HTML/CSS

Frontend: React, Vite, Angular, Tailwind

Backend: Node.js, Express, REST APIs

Tools: Git, Linux, Postman, Figma

Data: MongoDB, D3.js
